WELCOME

from the **President**

Welcome to the 2026 Nevada Waterfowl Association Dinner in Reno!! We hope this gathering will be both fun and informative for you tonight, while raising money to be spent benefiting Nevada's precious wetlands.

I want to thank the hardworking people on the Dinner Committee, without whom this evening would not be possible. I also want to thank the good folks at The Fowl Life Productions. They have been largely responsible for transforming our annual dinners over the last four years into what you see here tonight.

People often ask what their donations are being spent on. This year NWA has a variety of projects planned that we are excited about participating in. Those include the following:

The Terminal Wetlands Initiative is a new, multi-year project headed up by Chris Nicolai that will study Great Basin terminal wetlands and connect land managers to help them better maximize habitat, water use, food production, etc. This is a multiple year project that will be specific to Carson

Lake, Stillwater Marsh, Humboldt Sink and other terminal wetlands across the state and neighboring states.

NWA is working with NDOW to come up with a solution to improve boat access to the Humboldt WMA. This would include both airboat and mud motor access.

NWA has commissioned a preliminary engineering study to address lessening the impact of reoccurring flooding and the resulting damage to the wetlands at Carson Lake and Pasture that has taken place several times over the last dozen years. Once we receive the final report and a course of action is agreed upon, the process of securing funding for a project of this magnitude will be the next step.

Enjoy your evening with a room full of like-minded conservationists and hunters. I thank each of you for attending and for your continued support of the work the Nevada Waterfowl Association does.

*– Dave Stanley
Nevada Waterfowl Association President*
